

Software Developer

Location: London

A role with the excitement of a start-up and the stability of working with an established business. The Software developer would report directly to the Software Delivery Manager to help deliver the continued development and progress of the SaaS platform and its future features.

We believe the future of Resilience is powered by technology combined with human insight. Empowering us to safeguard people & enable operations to the organisations we work with to focus on their core business with confidence. Delivering solutions & services to realise this belief, is why we exist.

Restrata is a global provider of tech enabled emergency response and professional services to the oil and gas and energy industry. After recently investing in its own SaaS platform Restrata now provides a holistic solution comprising software platforms providing real time global visibility of 100% of a client's workforce, 24/7 managed services assisting clients managing their employee risk exposure and crisis management needs and professional services helping clients define and manage their crisis and emergency response requirements.

Responsibilities:

- Develop projects supporting the Delivery Manager in the best solutions design;
- Develop integration with external systems and technologies (.NET or Java, SAP, Microsoft SQL);
- Finish all assigned tasks with quality and within the defined estimate;
- Responsible for unit testing and integration testing;
- Working with an overall view of the project to make the best technical decisions;
- Support the less experienced developers, transmitting their knowledge and developing global team skills.

Technical Skills:

- Outsystems platform experience preferable;
- Proficiency with at least one programming language (.Net or Java) is a plus;
- Proficiency in web-based languages (JavaScript, CSS, HTML) is a plus;
- Programming with databases: SQL Server, Oracle or MySQL;
- Degree in computer science or other technical related fields;
- Fluency in English, written and spoken (mandatory);
- OutSystems project experience and certifications are a plus;
- Experience in Agile methodologies is a plus.

Key Requirements:

- Interpersonal and communication skills;
- Logical reasoning and analytical skills;
- Problem-solving skills;
- Proactivity, sense of responsibility and team spirit;
- Strong quality orientation and attention to detail;
- Ability to organize, estimate, and prioritize project tasks;
- Availability to travel.
