

Job Description – Graduate Security Consultant

Department: Consulting
Line Manager: Head of Consultancy

Role Overview:

Reporting directly to the Head of Consultancy within the security practice, this role is principally concerned with supporting the strategic advisory services to clients, to help them evaluate and manage their security related risks, and then transforming protection objectives (derived from the assessment of their risks) into mitigation measures through phased engineering design.

Key Tasks and Responsibilities:

- The role requires a graduate consultant with experience in a risk-based approach to design in the built environment and energy sectors. A person who has had exposure to the FEED environment for up to 3 years.
- The role requires experience in the built environment and energy sectors, for architects, engineers, major oil companies and EPC's
- The individual shall be required to provide support to Security Design Consultants and Senior Security Consultants throughout the strategic and technical design stages of a project.

Essential Capabilities/Skills:

The candidate should have an understanding of the following skills:

- Technical security designs
- Secure by design / CPTED Master-planning
- Business analysis and requirements engineering
- Threat and vulnerability assessments
- Geopolitical risk and CT design

Experience/Qualifications

The candidate should have experience in:

- Working as part of multi-disciplinary design teams within the built environment and energy sector
- Providing threat-based design guidance for security systems to clients covering:
 - Physical protection systems (gates, barriers etc.)
 - Electronic systems (CCTV, Access Control etc.)
 - Command and control
 - Systems integration
 - Security operational procedures and emergency planning
 - Information Assurance
- Support in the production of drawings, specifications, and Bills of Quantities for security systems design
- The candidate must have been part of a team that has successfully delivered work packages in the built environment and energy sectors within Europe, Asia or the GCC region

The following qualifications are desirable:

- Degree level qualified from an established university
- Member of a professional body that is relevant to the technical security environment (such as but not limited to):
 - IEE
 - CLAS
 - CISSP
 - APM
 - ICE
 - ASIS
 - CIMC
 - CEng
- A master's degree in a relevant security or consulting discipline is desirable
- Project management qualifications (Prince 2 / APM /PMP etc.)

Personal Attributes

The candidate should be confident and work well within multi-disciplinary teams and must be willing to work in any country that the company conducts its business, such as Iraq, Afghanistan, Asia and the MENA region.

In addition, the candidate should be able to prove the ability to:

- Plan unstructured problems and assignments from scratch
- Participate in workshops with clients
- Learn quickly and to work well under pressure
