

Software Test Engineer - Contract, London

Duration: 3 months

We are looking for a software test engineer experienced in manual and automated testing to join our team in London. This will be a contract role working on a greenfield software development project.

Skills & Experience:

- 3+ years' experience in manual and automated testing of Web & Mobile Apps
- Experience in Test automation using Selenium
- Experience in JIRA or similar agile project management/defect management tools
- Experience in building & executing test cases and plans
- Strong communication skills, both verbal and written

Key Responsibilities:

- Functional, Integration and Regression Testing (Manual & Automated)
- Plan, develop and execute software testing tasks for web & mobile application modules
- Using appropriate techniques to design test cases, test scripts and test data that will address identified test requirements and presenting them in an overall test design
- Provide estimates for and prioritise all testing activities required to deliver the project
- Analyse, document, and submit issues discovered during testing.
- Verify and close issues resolved during the release cycle Skills
